

GAME RULES

- **Structure:** All games will be played in 1 hour game-slots — including a flood — with games featuring a (2) minute warm-up, followed by two (2) 20-minute, run-time periods, where the clock will not stop under any instances. There will be a two (2) minute intermission between periods, with no timeouts or clock stoppages during game play. If a game is tied after regulation, the game will be recorded as such with no overtime or shootout taking place.
- **Switching Ends/Line Changes:** Teams will not change ends for the second period. Line changes will be permitted either on the fly, or during a re-start after a whistle has been blown.
- **Gloves:** Participants will be required to wear gloves on the ice at all times. In the event of a lost glove, that player will be required to retrieve their glove immediately from the ice.
- **Water Bottles:** Participants will be required to have an individual water bottle while at the arena, keeping it on a designated spot on the bench.
- **Handshakes:** Handshakes and first-bumps shall not occur before, during, or after the game.
- No spitting is allowed at any time while in the facility.
- **Pulling Goaltender:** Pulling your goaltender for an extra attacker will not be permitted
- **Offside:** Offsides will be called, if there is an off side; the team which went off side has to leave the puck and clear the blueline (delayed offside)
- **No Face-offs:** There will be no face-offs. In order to facilitate this, there are several different restart scenarios that players will need to be familiar with, which are outlined below.
- There will be no icings called.

1. START OF PERIOD

- **1st Period:** The designated visiting team will start the 1st period with possession of the puck at the centre-ice dot. The four players on the visiting team will be required to set up behind the red line, while the four players on the designated home team will be required to set up behind their defensive blue line. Once the whistle goes, teams on both sides will be permitted to engage the puck.
- **2nd Period:** Same scenario shall apply, with the change being that the designated home team retain possession to start the period.

2. OFFSIDE

- **Scenario:** When the players are offside, they must clear the offensive zone to the neutral zone before re-attacking in the offensive zone. Referees will coach the offending team out of the zone. If the play is whistled offside the puck will automatically be awarded to the opposing team.

3. GOAL SCORED

- **Scenario:** In the event of a goal scored, the team that scored the goal will need to have all four skaters retreat behind the red line before being able to re-engage with pressure. While the team that scored the goal is retreating to the red line, the team that was scored will re-initiate play by retrieving the puck from their goal and going the other way. Furthermore, the team that was scored on has the ability to press forward before the other team clears back to the red line, creating scenarios where teams will need to be quick to defend after scoring a goal.
- **Note:** If the team that was previously scored carries possession across the red line before each of the four (4) opposing skaters are able to retreat to the red line, players on the defending team will be able to engage the puck regardless of any teammates who have not yet reached the red line.

4.FROZEN PUCK/PUCK OUT OF PLAY

- **Frozen Puck/Offensive Puck Out of Play:** Should the goaltender cover the puck for a whistle, or the attacking zone team be responsible for the puck going out of play, all four (4) skaters on the attacking team will be required to clear to the blue-line before being able to re-engage the puck. Any turnover between the defensive blue-line and the red line will result in the other team remaining in the attacking zone.
- **Defensive/Neutral Zone Puck Out of Play:** If no attacking zone has been established, or if the defensive zone team is responsible for the puck leaving the playing surface, the same player positioning as an offside/icing re-start will apply, with the non-offending team initiating possession.

PENALTIES

- **Penalty Shots:** Any penalty call will result in a penalty shot being issued. A two-minute penalty will result in one (1) penalty shot being issued, a four-minute penalty will result in two (2) penalty shots being issued, with a five-minute penalty resulting in two (2) penalty shots and a game ejection. Players will not physically enter the penalty box during the Summer '20 season.
- **Shooter:** The player who is the victim of an infraction will be required to take the penalty shot(s). An alternate may be selected only in the event of injury, or an infraction not against another skater (e.g. Goaltender Interference, Too Many Men on the Ice)
- **Body Contact:** Any intentional body contact that results from a player not playing the puck with their stick will result in a four-minute body contact infraction being issued, along with two penalty shots for the non-offending team.
- **Crease Violation:** Any instance of a player intentionally entering the opposing team's crease will result in a goaltender interference infraction being issued
- **Penalty Thresholds:** Players will be ejected from the game if they accrue any combination of: (1) Two 4-minute penalties; (2) One 4-minute penalty, and two 2-minute penalties; (3) Three 2-minute penalties; or (4) One 5-minute major penalty.
- **Coincidental Penalties:** In the event of a coincidental penalty, no penalty shots shall be awarded, and the following re-start scenarios shall apply: (1) If the penalties occur when a team has gained the attacking zone, the defensive zone team shall be granted possession starting from below the hash-marks. The offensive team will be required to clear behind the blue-line before they are permitted to re-engage once the whistle goes; or (2) If the penalties occur when neither team has gained the attacking zone, the team in possession of the puck when the whistle goes will be granted possession at the centre-ice dot during a re-start, following the same procedure set forth in the offside/icing re-start scenario.
- **10-Minute Misconduct:** A 10-minute misconduct will result in the player being ejected from the game.

PENALTY SHOT SETUP

- A penalty shot shall be initiated from the blue-line, at a point between the neutral zone face-off dots. The remaining three skaters on the attacking team must be positioned behind the red line against the boards, while the four skaters on the defensive team must stand behind their own goal-line in either corner.
- Once the whistle goes, the player taking the penalty shot will be free to initiate their penalty shot
- In the event of a goal, the team that took the penalty shot will be required to clear back to the red line. Once all four (4) skaters on the team are behind the red line, the attacking team is free to re-engage and pressure the puck. The defensive team will be responsible for retrieving the puck out of the goal and can initiate play immediately.
- In the event of a save or a missed attempt, the team that took the penalty shot will be required to clear back to the blue line. Once all four (4) skaters on the team are behind the blue line, the attacking team is free to re-engage and pressure the puck. The defensive team will be responsible for retrieving the puck and can initiate play immediately. Should a puck leave the playing surface on a penalty shot, the defensive team will be given the puck below the hashmarks, with the shooting team required to retreat behind the blue-line before play resuming once the whistle goes. For a penalty that requires two penalty shot attempts, the process will be repeated from the beginning for the second penalty shot attempt, regardless of whether or not a goal was scored on the first attempt.

• **COVID-19 Questionnaire for Guests:** As a precautionary measure for guests and staff, please answer the following:

- Have you, your guest(s), a close family member, or resident of your household returned from traveling outside of Canada within the last 21 days? If so, have you or your guest(s) been in self isolation for 14 days prior to your arrival date at the Resort?
- Have you or your guest(s) been in close contact with someone who has a confirmed or probable case of COVID-19 or been in close contact with a person with an acute respiratory illness?
- Have you or your guest(s), close family members or colleagues have any symptoms of COVID-19 including: Fever of 38C or higher. Cough. Difficulty breathing or shortness of breath. Malaise (severe fatigue or feeling of being generally unwell).
- Are you residing or working anywhere with a COVID-19 outbreak?

PLEASE NOTE: Effective immediately, all guests must wear a face mask in all public indoor spaces of the resort as deemed mandatory by the Grey Bruce Health Unit.

Children 2 and under excluded. By signing below I agree to the terms and conditions outlined here and certify to the best of my knowledge that myself and my guest(s) do not have COVID-19. I agree to wear a face covering in indoor public spaces while at the Resort and its subsidiary buildings and acknowledge that if I am not able to comply I may be denied service and asked to leave the premise.
